Name: King Landscaping

Description: My webpage will be a store selling landscaping products. Items that will be sold include mulch, lawnmower, and other equipment that would normally be used.

Page List:

1. Home
2. About store
3. Look at Mowers and other equipment
4. Look at mulch and flowers
5. Cart/Checkout

The data that will be stored will include each item's name, price, and description. It will also be asking for a name upon sign-in so it knows who the cart is for. Finally, it will be storing all the items that are added to the cart so multiple items can be bought at once at checkout.
